IAC 11-09-02	DPW	Repair or Replace Playground at the top of Funston Road above the CDC on Fort Shafter	The kids in the neighborhood need somewhere to play but the playground that is situated above the CDC on Fort Shafter is a safety hazard and cannot be used.	Replace or remove playground, if not feasible to replace, what is the possibility of installing a basketball court and providing public access to the bathrooms located adjacent to that area. I hope we can get something done for the children in this particular neighborhood for they don't have a place to play.	As of 9/27: Per DPW, this playground was run down and the equipment was replaced approximately 5 years ago, more information is needed because originally, there was concern about the playground equipment that was there but now there is actually a new playground about a 3 minutes walk from this location. More information is needed to determine whether or not this issue has to do with the equipmenet or the residents would like more play area, i.e., green space, basketball court, etc.; although this area is not in IPCs footprint, it serves the housing area. Per IPC, when this playground equipment was installed originally, there was no playground for children at all on FS; this was the only playground on FS; so this was a compromise and since then we have done several playgrounds and one will be opening up in the Hau'oli Heights South.	Open-Active

IAC 11-09-02 (cont'd)	DPW	Repair or Replace Playground at the top of Funston Road above the CDC on Fort Shafter	(Continued)		DPWs short term recommendation is to remove the playground equipment because there is another playground not too far from there. Work with IPC to determine what it is the residents would like to see happen.	Open-Active

IAC-11-09-03	DPW/DES/ Safety	Pedestrian and PT Traffic Congestion Before and After School Hours - Safety Hazard	Heading South and North on Trimble at the light at Carpenter and Trimble drivers should not be able to turn into Carpenter (right or left) during school hours of 7:30-8:30 am and 1:30-2:30 pm, there is so much pedestrian traffic crossing the street that it causes drivers to speed up in order to make the light causing a bigger safety concern. Current location of the no turning signs are too way in that noone see's it or pays attention to it.	That a traffic survey be conducted during these peak hours of foot traffic to determine the best course of action in order to make it a safer place for our children. Relocate signs to a more strategic area where motorists will see and have military presence to instill law and order.	Issue received from Ask the Garrison Commander. As of 9/13/11: Safety nonconcur with request. Closure of access to Carpenter would shift traffic to other routes and place undue burden upon housing sidestreets. Traffic light could be re-timed to finish pedestrian access and still allow a gree light to Trimble traffic for 30-40 seconds; sufficient for 5-6 cars (based upon opposing traffic). DPW: DPW has a project to install dedicated traffic turn lights on that intersection. The project is scheduled for FY12. At this time, the traffic light doesn't have a dedicated turn signal (arrow - left or right) from Trimble into Carpenter. As of 9/27: clarification required. As of 10/18: Issue deals with traffic and PT congestion during before and after school hours, request military presence to monitor and deter motorists from speeding. Relocate No Turning signs so motorists can see it. Recommend: Open	Open-Active
