

For questions about submitting public comments, please call (808)656-3152.

Public meetings will also be held, beginning with an open house from 5:30 pm – 6:45 pm with information provided on the SDEIS, followed by public comments to be received from 7:00 pm – 9:30 pm at the following locations:

October 6, 2008 Nanakuli High School 89-980 Nanakuli Avenue Waianae, HI 96792

October 7, 2008, Oahu (location now being finalized), HI

October 8, 2008 Aunt Sally's Kaleohano's Luau Hale 799 Piilani Street Hilo, HI 96720

October 9, 2008 Waimea Community Center 65-1260 Kawaihae Road Kamuela, HI 96743

The public comment period for the SDEIS ends November 3, 2008, 45 days after today's Notice of Availability publication in the *Federal Register* by the U.S. Environmental Protection Agency. A Final EIS will be published following the comment period on the SDEIS and incorporation of public comments.

BACKGROUND:

Located in Makua Valley on the western shore of Oahu, MMR has been used as a live-fire training area for the Army and other military branches since 1943. In 1988, the Army constructed the Company Combined-Arms Assault Course (CCAAC) as its training facility and actively used it for the next 10 years. In 1998, several wildland fires, which were caused by military training, started outside the designated impact areas. The Army then voluntarily suspended all training at MMR to conduct an investigation of the fires and to reevaluate its training and fire management procedures. In 2000, Malama Makua, a non-profit corporation, sued the Army in Hawaii federal district court seeking preparation of an Environmental Impact Statement (EIS). In July 2001, the judge enjoined the Army from conducting live-fire military training at MMR. In settlement of this litigation, the Army began preparing an EIS to support resumption of live-fire training at MMR in the fall of 2001.

The Army issued a Draft EIS for public comment in 2005. Since that time, the Army has made several changes to the EIS in response to public comments including the evaluation of an additional training alternative at the Pohakuloa Training Area (PTA). The Army is therefore republishing the EIS as a supplemental draft to seek public comment.

The Army has prepared a SDEIS for its training activities at MMR pursuant to Section 102(2)(c) of the National Environmental Policy Act of 1969 (NEPA), the Council on Environmental Quality regulations (40 CFR Part 1500-1508), and Environmental Analysis of Army Actions (32 CFR Part 651).

The SDEIS analyzes four alternatives to accomplish the proposed training in the State of Hawaii: MMR Alternative 1 (Reduced Capacity Use with Some Weapons

Restrictions), MMR Alternative 2 (Full Capacity Use with Some Weapons Restrictions), MMR Alternative 3 (Full Capacity Use with Fewer Restrictions), and PTA Alternative 4 (Full Capacity Use with Fewer Weapons Restrictions). Alternative 3 is the Army's Preferred Alternative. A No Action Alternative, under which no live-fire military training would be conducted at MMR, is also evaluated.

For all alternatives (with the exception of No Action), the range would be used for 242 training days per year. MMR Alternative 1 (Reduced Capacity Use) involves conducting up to 28 company-level combined arms live-fire exercises (CALFEXs) per year and 100 convoy live-fire exercises per year. MMR Alternatives 2, 3 and 4 (Full Capacity Use) involve conducting up to 50 company-level CALFEXs per year and 200 convoy live-fire exercises per year. Weapon systems used for all training alternatives would be similar to those used during past training at MMR. In addition to the current weapons systems, MMR Alternative 2 incorporates the use of small arms tracer ammunition. MMR Alternative 3 (Preferred Alternative) adds tracer ammunition; inert, tube-launched, optically-tracked, wire-guided (TOW) missiles; 2.75-inch rockets; and illumination munitions. PTA Alternative 4 would encompass training similar to that in Alternative 3. The Army would phase in certain training activities and ammunition types as steps are taken to conserve endangered species.

Some of the major potential impacts discussed in the SDEIS are associated with contamination of soil; surface water and groundwater quality; air quality; cultural sites; natural resources; endangered and threatened species; noise; recreational resources; wildfires; and the safety and transport of munitions through the Waianae community.

The U.S. Army will conduct additional studies as part of a Supplemental Marine Resources Study to meet the stipulations in a January 2007 Settlement Agreement between Plaintiff Malama Makua, through their counsel Earthjustice, and the U.S. Army.

This Supplemental Study will expand upon the findings of the 2007 Marine Resources Study by focusing on the sampling and analysis of shellfish. The Army will follow the previously established and agreed upon field sampling protocols for this study. This Supplemental Marine Resources Study will determine whether consumable shellfish resources near Mākua Beach and in the Mākua *muliwai* are contaminated with constituents associated with training activities at MMR.

A public meeting will also be held at the shellfish study's conclusion to specifically collect public input on its results. The date, time and location of this meeting, anticipated in the December timeframe, will be announced in the future.

FOR IMMEDIATE RELEASE

Makua SDEIS Update

SCHOFIELD BARRACKS, Hawaii – The Department of the Army will issue a Supplemental Draft Environmental Impact Statement (SDEIS) this month for resumption of live fire training at the Makua Military Reservation in Hawaii. Public comments to this new draft will be considered in preparing a final statement and decision by the Army on Makua's future use.

The original DEIS was issued in 2005 but several developments over the past three years have necessitated a new draft. These include analyzing the cumulative impact of stationing additional Army units and Stryker combat vehicles in Hawaii; additional clearance of unexploded ordnance to expand safe cultural access at Makua; and Army responses to a 2007-08 biological opinion regarding Makua.

"Several changes were made to the initial draft Environmental Impact Statement in response to public comments," said Maj. Gen. Raymond Mason, senior commander of Army installations in Hawaii. "With the release of this supplemental draft EIS we look forward to receiving valuable input and concerns from the community."

The new draft will have a 45-day public comment period, and public meetings will be held on Oahu and the Big Island. The Army will take all public input and develop the final environmental impact statement.

The new draft's notice of availability is expected to be published in the Federal Register this Friday. The exact dates, times and locations of the public meetings are being finalized and will be announced as soon as possible. Information on how to submit public comments by e-mail, fax, on-line or by U.S. mail will also be provided at that time.

This new draft, when released, will show a thorough analysis of potential environmental impacts associated with the Army's proposed use of MMR and follows the National Environmental Policy Act (NEPA) as well as other regulations. The Supplemental Draft EIS addresses all comments to the original draft EIS.

MMR SDEIS Draft Legal Notice (18 SEP 2008)

PUBLIC NOTICE

Notice of Availability for the Supplemental Draft Environmental Impact Statement for Military Training Activities at Makua Military Reservation

The Army has published a supplemental draft environmental impact statement (SDEIS) for military training activities at Makua Military Reservation (MMR). The Army has prepared this SDEIS to address the potential direct, indirect, and cumulative environmental impacts associated with the proposed use of MMR and alternatives for live-fire military training, in particular company-level, combined-arms, live-fire exercises (CALFEXs), and convoy live-fire training.

This SDEIS analyzes the no action alternative and four alternatives to accomplish the proposed action: 1) Makua Military Reservation (reduced capacity use with some weapons restrictions); 2) Makua Military Reservation (full capacity use with some weapons restrictions); 3) Makua Military Reservation (full capacity use with fewer weapons restrictions); and 4) Pohakuloa Training Area (full capacity use with fewer weapons restrictions).

The Army will take all public input into consideration before developing the final environmental impact statement. Public comments are important for the successful completion of this stage of the NEPA process, but must be received by Nov. 3, 2008.

Public meetings will be held with an informal information session- from 5:30 p.m. – 6:45 p.m. with Army subject matter experts available to answer specific questions about the SDEIS document, followed by a facilitated public comment session from 7:00 p.m. – 9:30 p.m. Please check the website (<http://www.garrison.hawaii.army.mil/makuaeis>) under announcements for specific dates and locations.

The SDEIS can be accessed for reading or download at www.garrison.hawaii.army.mil/makuaeis. For further information, please contact the Public Affairs Office at (808) 656-3152 or e-mail usaghipaomakuaeis@hawaii.army.mil. Public comments may be submitted on line, by email, by fax (808) 656-3162 or by mail to US Army Garrison - Hawaii, Attn: Makua EIS Public Comments, 742 Santos Dumont, WAAF, Schofield Barracks, HI 96857

Army revises Makua draft EIS

Advertiser Staff and News Reports

The Army, in a draft of a supplemental environmental impact statement released yesterday, says it wants to conduct up to 50 company-level combined arms live-fire exercises at Makua Valley each year.

The draft is the latest in a series of documents prepared by the Army arising from complaints about its training in the valley, which contains sites that Native Hawaiians consider sacred.

Malama Makua, a Wai'anae Coast community group, sued the Army in 1998 to demand an environmental impact statement before the Army continued to use the valley for live-fire training.

A judge ruled in favor of the group.

The Army finished its original draft EIS in 2005 but had to revise it. The Army views Makua as vital because it's the only place in Hawai'i where an entire company of soldiers may use live ammunition in exercises.

The Army is seeking public comment on the draft, which can be accessed online at www.garrison.hawaii.army.mil/makuaeis.

Public comments to this new draft will be considered in preparing a final statement and decision by the Army on Makua's future use, the Army said in a news release.

The supplemental draft EIS includes a 45-day public comment period and four public hearings, after

which the Army will review all public comments and use them to assist in the preparation of a final EIS, the Army said.

The Army expects to issue the final EIS in the spring of 2009, the release said.

Copies of the SDEIS will be available at the following libraries on the islands of O'ahu and Hawai'i:

- Hawai'i State Library, 478 S. King St., Honolulu.
- Wahiawa Public Library, 820 California Ave., Wahiawa.
- Wai'anae Public Library, 85-625 Farrington Highway, Wai'anae.
- Pearl City Public Library, 1138 Waimano Home Road, Pearl City.
- Hilo Public Library, 300 Waianuenue Avenue, Hilo.
- Kailua, Kona Public Library, 75-138 Hualalai Road, Kailua, Kona.
- Thelma Parker Memorial Public and School Library, 67-1209 Mamalahoa Hwy., Waimea.

Over the next 45 days, public comments may be submitted online at www.garrison.hawaii.army.mil/makuaeis; by fax to 656-3162; by e-mail to usaghipaomakuaeis@hawaii.army.mil; or by mail to: Attn: Makua SDEIS Public Comments, USAG-HI Public Affairs Office, 742 Santos Dumont, WAAF, Schofield Barracks, HI 96857.

For questions about submitting public comments, call 656-3152.

Public meetings will also be held from 5:30 to 9:30 p.m. — the first half will be an open house with information provided by the SDEIS, and the second half will be open to public comments. The meetings will take place at the following locations:

- Oct. 6: Nanakuli High School, 89-980 Nanakuli Ave.
- Oct. 7: O'ahu (location being finalized).
- Oct. 8: Aunty Sally Kaleohano's Luau Hale, 799 Pi'ilani St., Hilo.
- Oct. 9: Waimea Community Center, 65-1260 Kawaihae Road, Waimea.

The public comment period for the SDEIS ends Nov. 3, 45 days after today's Notice of Availability publication in the Federal Register by the U.S. Environmental Protection Agency.

A final EIS will be published following the comment period on the SDEIS and incorporation of public comments.
