

CULTURAL RESOURCES

- Cultural resources inventory survey and a surface/subsurface evaluation were conducted at the proposed IPBA preferred alternative identifying the following types of cultural resources:

Feature B at site T-102010-4, a fairly typical pāhoehoe pit excavation site with a small rock alignment constructed out of the excavated pāhoehoe

Feature S at T-110910-1), large area cleared of big rocks in the site core. Other features (small cairns, a c-shape, excavated outcrops) are marked with orange flags

An overhang located within opening of lava tube cave site T-111010-1. Includes multiple hearths and ash deposits, hundreds of charred/uncharred bird bones, and some plant fibers in the overhang.

A nearly complete gourd in the interior of a lava tube cave site TL-110910-04.
